

Parts of the Earth:

1. Crust-

- a. Outermost layer of lithosphere
- b. Relatively thin (5-50km thick)
- c. Two types- Oceanic + Continental
- d. Is made up of rocks

2. Mantle-

- a. Layer under the crust
- b. Relatively thick (3000km)
- c. Made up of magma, very hot
- d. Convection currents move plates

3. Core-

- a. Innermost layer of the Earth
- b. Composed mostly of Iron
- c. Extremely hot
- d. Made up of two layers- Outer + Inner
